

Brief description:

Humber Valley Resort:

Humber Valley Resort:

The luxurious Humber Valley Resort is situated on the West coast of Newfoundland / Canada. The resort is located approximately at the latitude of Paris and has temperate climate with four full seasons. There are currently only a few places in the world where nature is so genuine and where you can explore wildlife like Moose and other animals. The possibility for outdoor sports is unlimited.

I would like to briefly summarize some opportunities and advantages offered by the resort:

- Award-winning 18-hole championship golf course at the resort
- The Humber River, one of the richest salmon rivers in the world flows through the resort and invites to fly fishing
Whale watching and iceberg watching
- 60% of the richest salmon rivers are in Newfoundland
- The Humber Valley Resort is located on Deer Lake and offers water sports of all kinds and invites in summer for swimming
- UNESCO Heritage - National Park Gross Morne is located close to the resort and offers countless possibilities for hiking, biking, cross country skiing and much more.
- Marble Mountain ski resort, the largest ski area in Canada on the East Coast, just 10 Minutes away from the resort offers slopes and deep snow slopes in any difficulty and without any waiting time.
- Snowmobiling on over 2000 km of trails
- Lowest crime rate, absolutely safe destination
- Corner Brooks is a town with 30,000 inhabitants with any infrastructure such as hospital, supermarkets etc. to reach by car in 10 minutes

The Humber Valley Resort is located only about 15 minutes by car from the international airport Deer Lake. The flying time from London is only between 4 and 5 hours. The time difference to Newfoundland is only 4.5 hours.
